DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/23/06 has been entered.

Election/Restrictions

2. Applicant's election without traverse of Figure 2, claims 8-15, 37-44, and 66-73 in the reply filed on 6/25/03 is acknowledged.
3. Claims 1-7, 16-36, 45-65, and 74-87 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected embodiment, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/25/03.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 8-15, 37-44, 66-73, and 88-90 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Naimpally et al (5,294,974) for the same reasons as set forth in Section 5 of the previous office action, dated 4/8/05.

Response to Arguments

6. Applicant's arguments filed 1/23/06 have been fully considered but they are not persuasive. Applicant asserts on pages 52 of the Remarks that Naimpally et al fails to disclose the second QP value is dependent only upon a relationship to the first QP value. However, Figures 2 and 6 of Naimpally et al illustrate the concept of such relationship comprising a property that the second QP value for the color channel is lower than the first QP value for the luminance channel (see col. 5, line 36 - col. 6, line 36).

Applicant also asserts that Naimpally et al discloses a function of multiple relationships. However, it is noted applicant agrees that the QP values of Naimpally et al are dependent only upon relationship (1), (2), or (3) as specified in lines 10-12 of page 53 of the Remarks.

Finally, with respect to the newly added claims 88-90, column 7 of Naimpally et al already discloses the concept of such look up table comprising a plurality of QP values.
